

the alkylene glycol being present in an amount of more than 12% by weight to provide for mutual dissolution of said active agent;

71 Cmt  
b) a viscosity enhancing agent for imparting a solid consistency to the composition which comprises 15 to 55% by weight of a waxy substance; and

c) a plasticizing agent which comprises 2 to 30% by weight of a plasticizing oil;

all percentages being based on the total weight of the carrier system.

---

72  
86. (Twice Amended) A composition as claimed in Claim 55, wherein the plasticizing oil is selected from branched chain aliphatic acids and alcohols which reduce the viscosity of the carrier system.
